

POLAR Refrigeration GmbH is a company which manufactures equipment for refrigeration and gas processing according to customer requirements. The company is based in Berlin and plans and builds customized refrigeration and compressor units for special applications in refrigeration, gases compression and processing. Our focus is primarily on the oil, gas and chemical industries.

To strengthen our team at the location in Berlin at the earliest possible date, we are looking for a

Execution Engineer (w / m / d)

The area of responsibility essentially comprises the following activities:

- Designing of P&ID flow diagrams and component parts lists
- Technical and commercial order processing up to handover to the customer
- Coordination of conception and implementation with sales and assembly departments
- Conducting purchasing negotiations as well as drafting purchase orders and service contracts with suppliers
- Project scheduling and deadline monitoring
- Cooperation with CAD department
- Creation of the project documentation
- Participation in meetings with a readiness for missions abroad

Your profile:

- Completed studies in engineering, specializing in process engineering or mechanical engineering
- Several years of professional experience in plant construction, preferably in the field of refrigeration or compression systems
- Very independent and structured way of working
- Confident handling of MS Office
- Good knowledge of English, as the project handling and communication is only in English

We offer:

- Vacation days according to company policy (max. 30 days)
- Individual internal and external training opportunities
- Comprehensive training in the team
- A friendly / collegial / familiar working atmosphere
- A secure job with long-term prospects in a future-oriented industry
